## **Steel Circular Column System** **The Fastest Formwork Solution for Circular Columns**

**Steel Circular Column System combines simplicity and strength, to be one of the best performing formwork solutions available to contractors.**

Circular columns formwork provides contractors with safe, versatile and economical circular steel forms. The key-bolt simply turns two identical steel half shell structures into a perfect round structural form.

The forms of the columns are produced in many sizes according to the site's requirement. They guarantee perfect performance with special care from the manufacturing unit to prevent bleeding at joints during all stages of construction.

The circular column formwork can withstand large pressure loads and transfer it to suitable stratum. It can also be combined with modular formwork for curved wall finishes and oval columns.

**Wide range of diameters:  
30 cm to 200 cm every 5 cm.**

**Built-in stabilizer connections  
within the formwork.**

**Height range: varies from 50 cm  
up to 600 cm every 10 cm.**

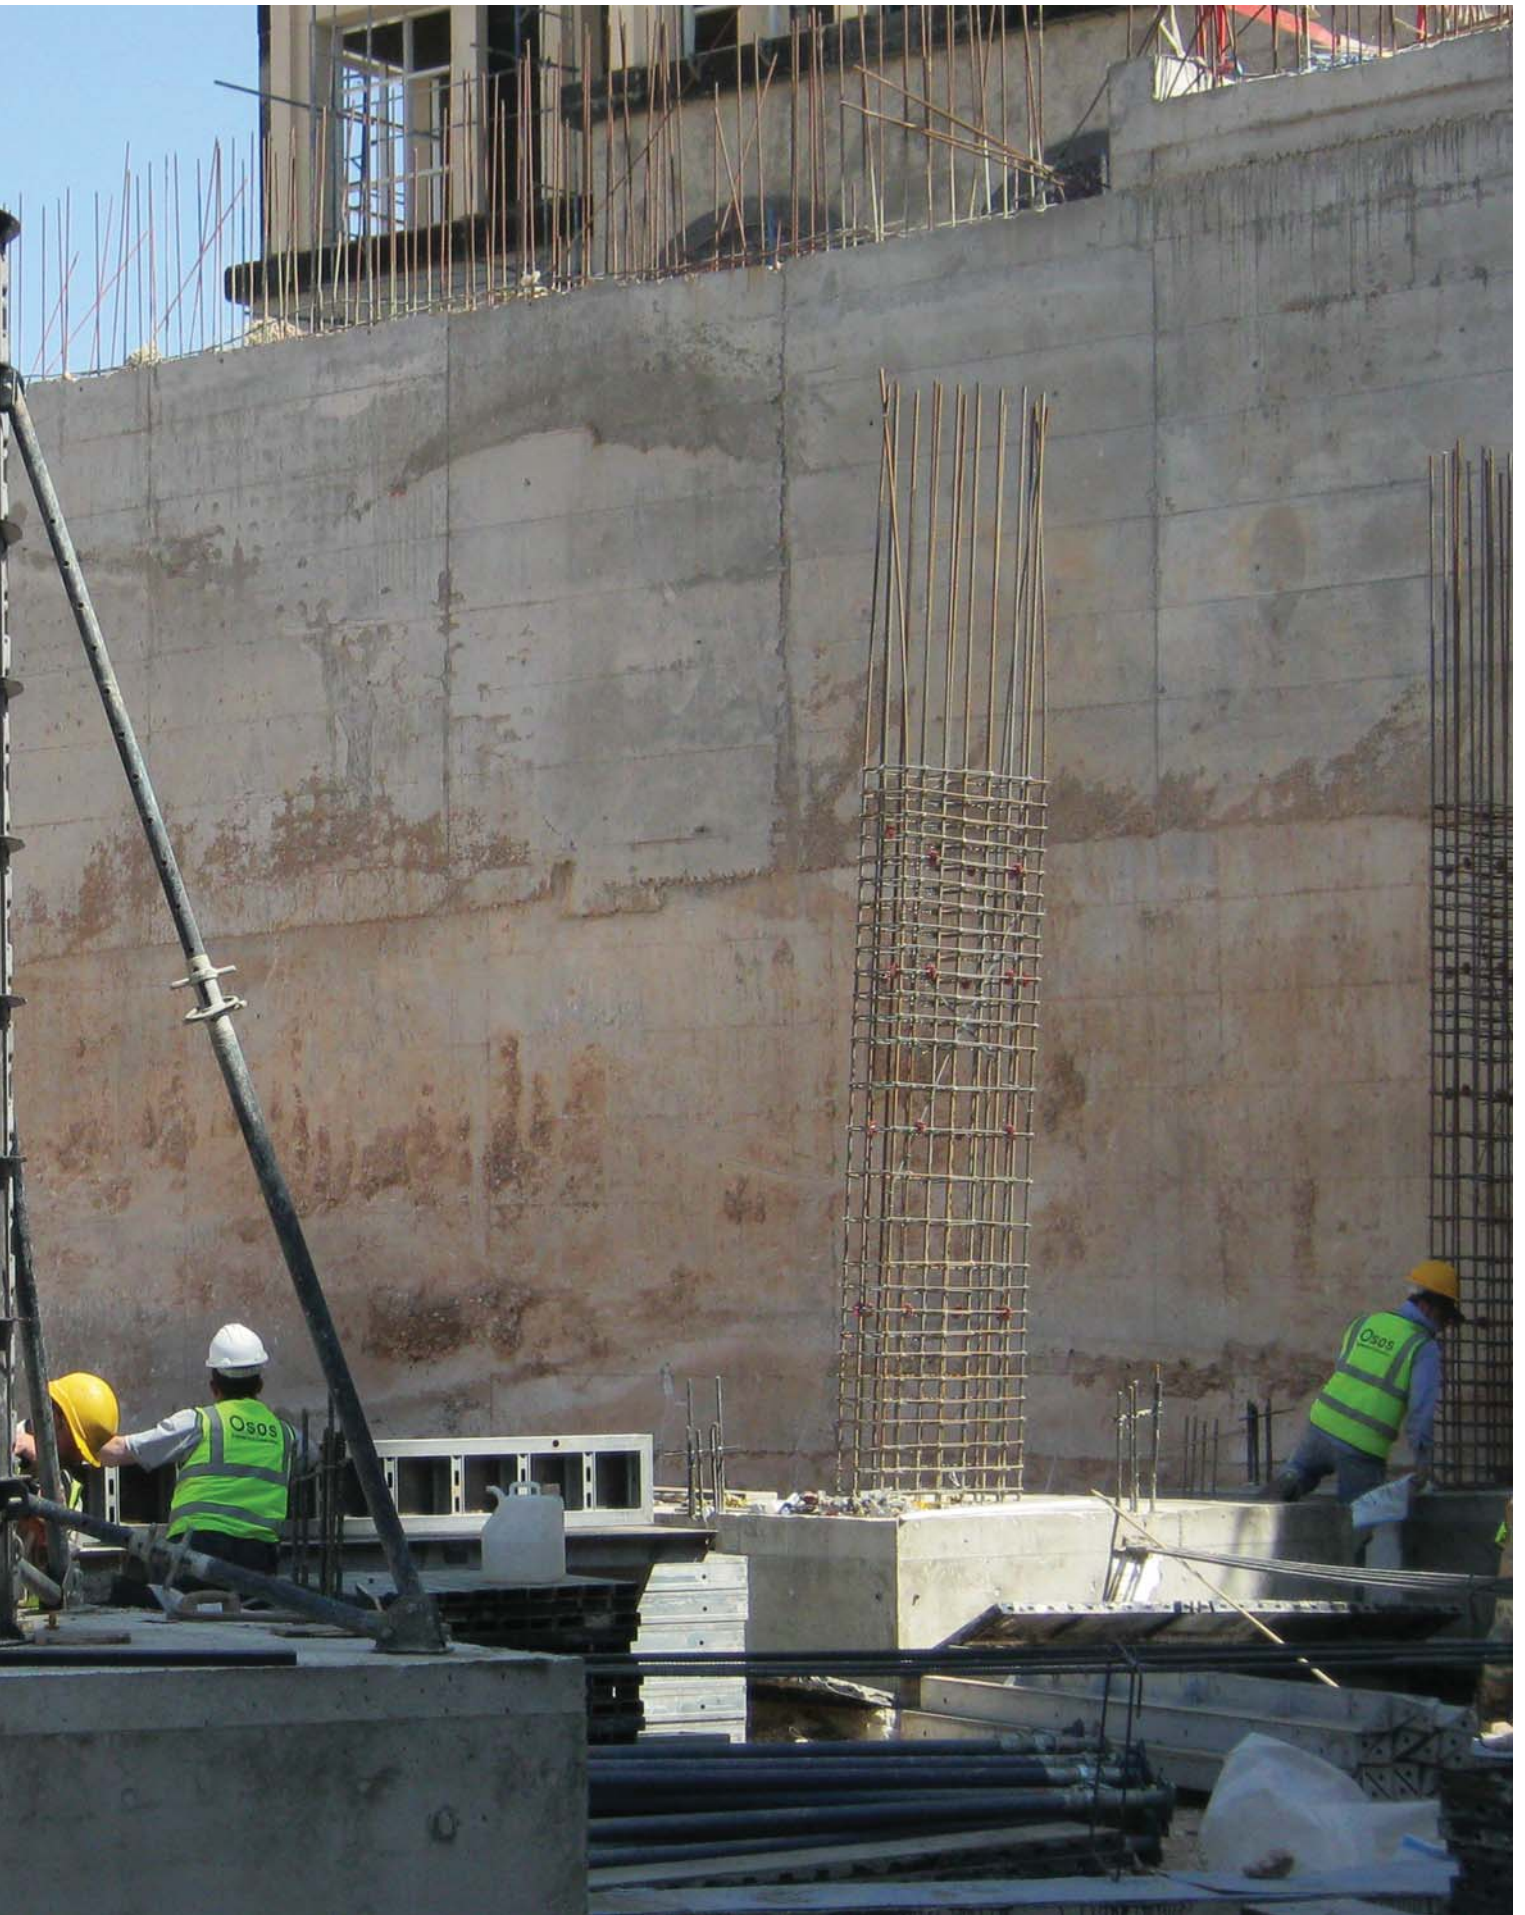

**Excellent concrete finishing.**

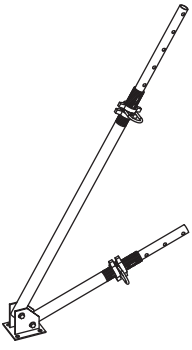

**Simple joining of panels with key-bolts.**

## Best Performance with Steel Formwork
